

FY 2010 DATA BOOK

Extramural Loan Repayment Programs

NIH Division of Loan Repayment

Revised: March 1, 2014

Fiscal Year 2010 Highlights

Fiscal Year period covers
October 1, 2009 to September 30, 2010

Application Cycle:

September 1 - November 15, 2009

Table of Contents

NIH Institutes and Centers	3
The Year in Review	4
The Five Extramural Loan Repayment Programs	5

* Participating in the Extramural Loan Repayment Programs

The Year in Review

In Fiscal Year (FY) 2010, 3,217 individuals applied to the five Extramural Loan Repayment Programs (LRPs): Clinical Research, Pediatric Research, Health Disparities Research, Clinical Research for Individuals from Disadvantaged Backgrounds, and Contraception and Infertility Research. Of those applicants, 1,584 were awarded contracts totaling \$73,577,093.95. The combined (new and renewal applicants) success rate for the Extramural LRPs was 47 percent.

The Extramural Clinical Research LRP received 55 percent (1,771) of all applications.

New applicants (those not previously funded) constituted 63 percent of all applications while renewal applicants (those previously funded) comprised 37 percent of all applicants. Success rates for new and renewal applicants were 36 and 67 percent, respectively.

The LRPs are open to health professionals with doctoral level degrees or advanced certifications and varying levels of experience. Most new FY 2010 awardees are beginning their careers, with 58 percent having received their qualifying degrees within the last 5 years and 94 percent within the past 10 years.

Physician doctorates (including dual physician doctorates and academic doctorates, for example, MD/PhD degrees) comprised 52 percent of the 1,604 awards, while those with academic doctoral level degrees comprised 45 percent of the total awards.

Seventy-four percent of the new awardees had educational debt greater than \$50,000, with 10 percent having debt levels greater than \$200,000. In comparison, 36 percent of the renewal awardees had educational debt greater than \$50,000, with 1 percent having debt levels greater than \$200,000.

Women received 857 of the 1,604 LRP awards. Black/African American applicants received 143 awards, Asians received 149 awards, Hispanics received 90 awards, and American Indians/Alaska Natives were recipients of 9 awards.

The Five Extramural Loan Repayment Programs

Clinical Research LRP:

Clinical research is patient-oriented clinical research conducted with human subjects, or research on the causes and consequences of disease in human populations involving material of human origin (such as tissue specimens and cognitive phenomena) for which an investigator or colleague directly interacts with human subjects in an outpatient or inpatient setting to clarify a problem in human physiology, pathophysiology or disease, or epidemiologic or behavioral studies, outcomes research or health services research, or developing new technologies, therapeutic interventions, or clinical trials.

Pediatric Research LRP:

Qualified Pediatric Research is defined as research directly related to diseases, disorders, and other conditions in children.

Health Disparities Research LRP:

The scope of research qualified for this program includes basic research, clinical research or behavioral research directly related to health disparity populations and the medically underserved. Group is defined as a health disparity population: if there is a significant disparity in the overall rate of disease incidence, prevalence, morbidity, mortality, or survival rates in the population as compared to the health status of the general population.

Clinical Research for Individuals from Disadvantaged Backgrounds LRP:

For this program, an individual from a disadvantaged background is defined according to low family income levels set by the U.S. Bureau of the Census – as published in the Federal Register.

To meet this low-income requirement candidates must demonstrate their disadvantaged status by submitting (1) a written statement from former school(s) where he/she qualified for Federal disadvantaged assistance, (2) verification of receipt of loans from either the Health Professions Student Loans (HPSL) or Loans for Disadvantaged Student Program, or (3) verification of a scholarship from the U.S. Department of Health and Human Services under the Scholarship for Individuals with Exceptional Financial Need.

Contraception and Infertility Research LRP:

Contraception research is defined as research whose ultimate goal is to provide new or improved methods of preventing pregnancy. Infertility research is defined as research whose long-range objective is to evaluate, treat, or ameliorate conditions which result in the failure of couples to either conceive or bear young.
